

*CLINICAE*

*Offline-First Clinic OS*

# THE PROBLEM

---

*Digital Infrastructure for Frontline Healthcare*

*Frontline clinics operate in challenging infrastructure environments.*

*Despite national digital health systems...*

01

*Internet connectivity is unreliable*

02

*Data entry often happens after service delivery*

03

*Frontline operational realities remain underserved.*

*The gap is not software ... it is context*

# THE SOLUTION

*Offline-First. Integration-Ready*

# *CLINICAE is built to power daily clinical operations offline-first*

*Runs on low-power devices*

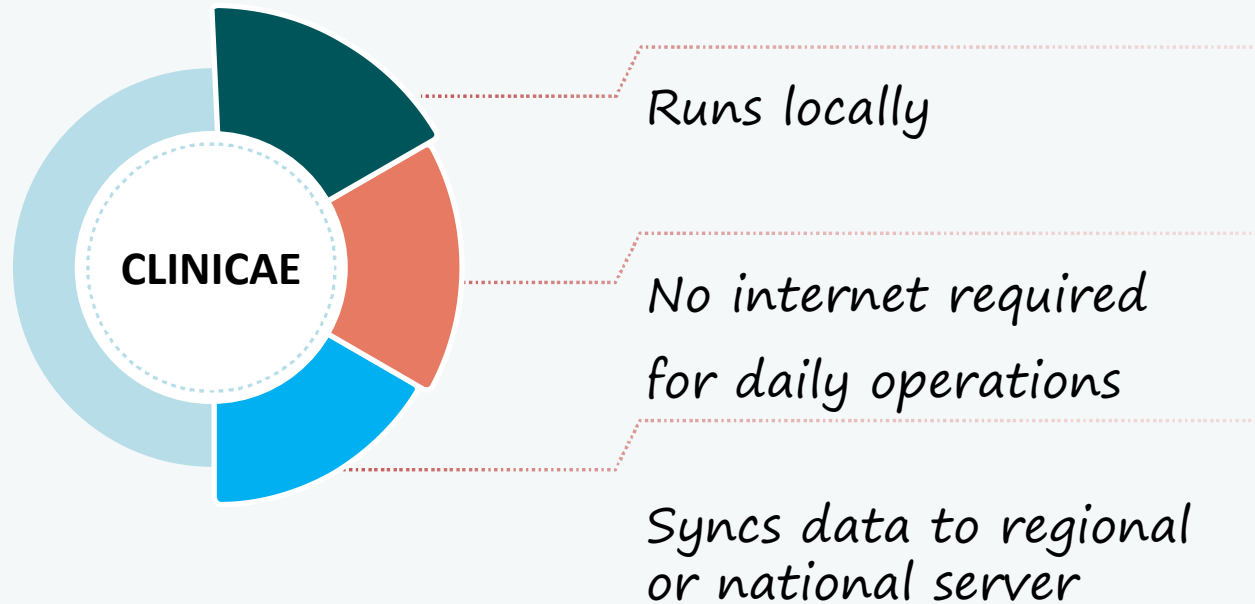

*Works without internet*

*Syncs when connectivity is available*

*Simple - Modular - Deployable anywhere*

# The system synchronizes seamlessly with national health platforms

*CLINICAE becomes the operational engine beneath national reporting.*

# VISION & SCALE

---

*Offline-First. Integration-Ready*

*Our technology architecture is lightweight, secure and integration-ready.*

*Designed for Frontline healthcare realities*

1

*Low memory usage*

3

*Future scalability*

2

*Offline functionality*

4

*Integration compatibility*

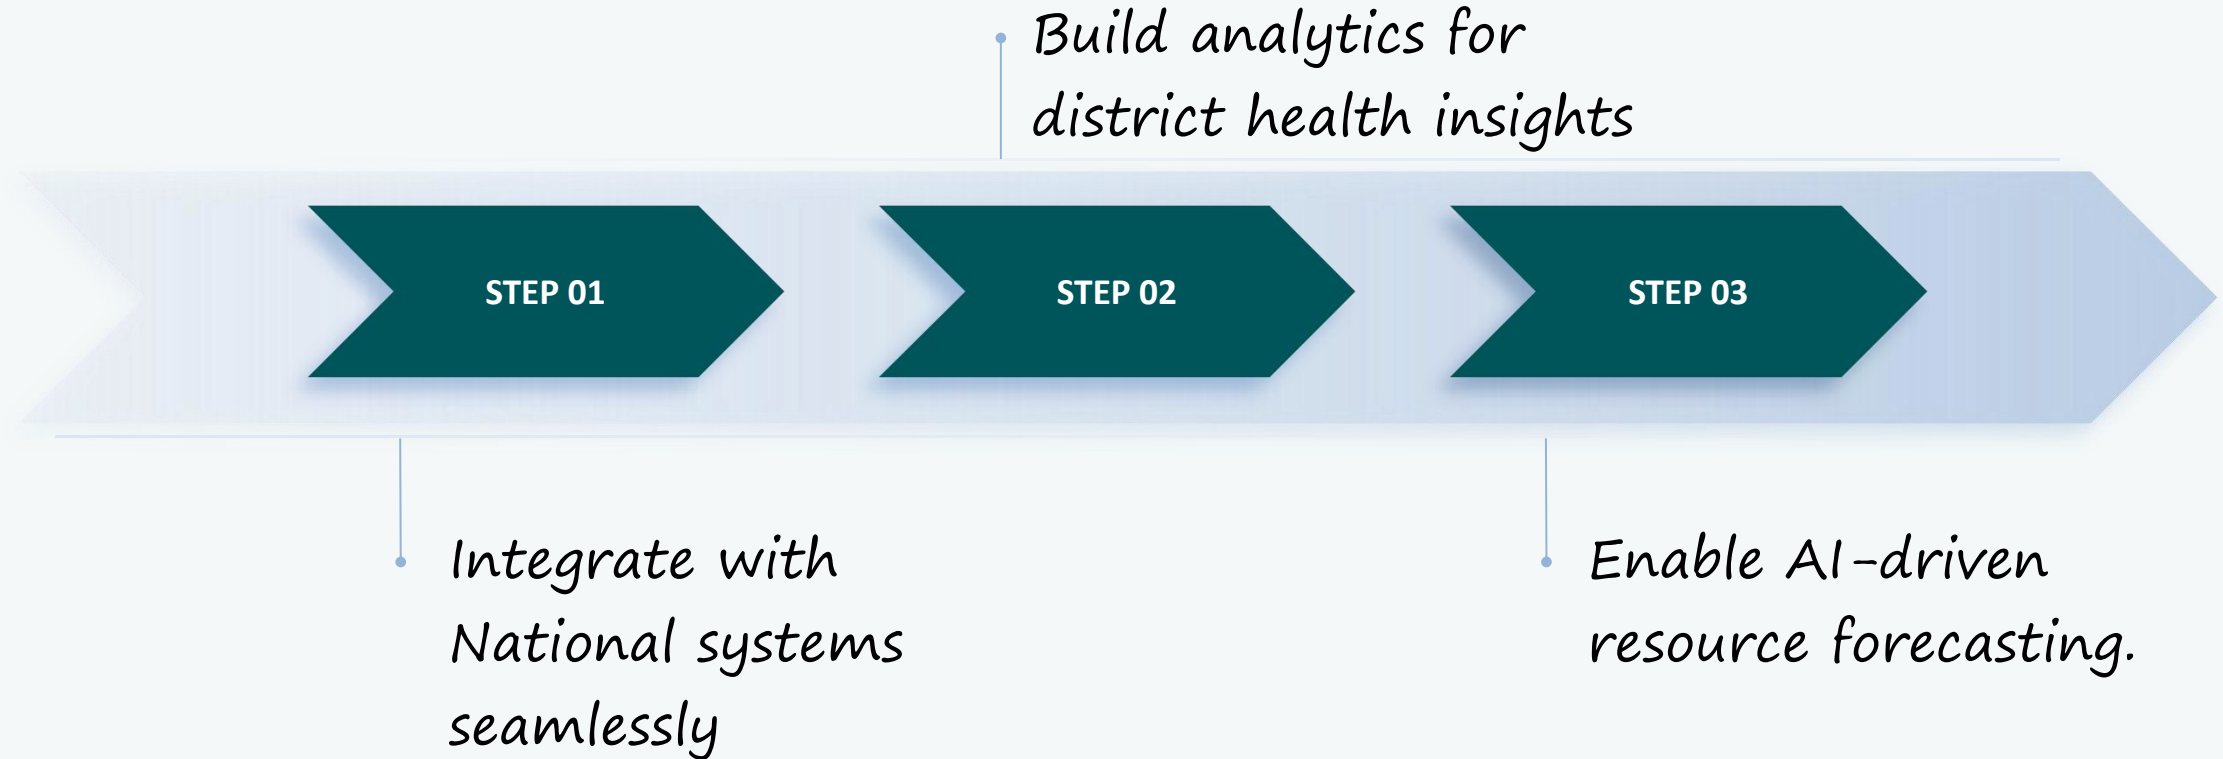

*We strengthen national health data from the bottom up.*

# *CLINICAE advances the next era of digital health delivery*

*CLINICAE aims to:*

*We strengthen national health data from the bottom up.*

# Our Team

## Kampamba Shula
